

# Integrated Workforce Management Platform

One connected platform for small and growing businesses

## Built For Teams That Mean Business

### Reduce Billing Delays

Timesheets, approvals, and project tracking stay connected, helping you invoice work sooner and improve cash flow.

### Increase Operational Speed

Automate approvals, attendance, onboarding, ticket tracking, and training workflows to keep work moving without manual follow-up.

### Gain Real-Time Visibility

See project budgets, resource allocation, pending approvals, and operational bottlenecks in one place.

# Are your systems keeping up with your growth?

As your team grows, the tools you relied on start getting in the way. Spreadsheets and disconnected apps create bottlenecks — the bigger you get, the more time you spend on admin instead of the work that actually matters.

## Siloed Data

Spreadsheets and standalone tools create duplication, errors and costly delays.

## Manual Processes

Approvals, timesheets and leave requests consume time that should go to higher-value work

## No Clear Visibility

Without real-time reporting, leaders struggle to track costs and productivity with confidence.

## THE SOLUTION

# One platform. Less admin.

### One login. One platform.

---

Everything your team needs — workforce, projects, tickets, timesheets — connected.

### Automates the admin.

---

Approvals, leave, workflows and reporting handled without manual effort.

### Live in 6-10 weeks.

---

Our specialists implement alongside your team from day one..

# A full suite of modules, built to work together

Start with what matters most and expand as you grow. Every module shares the same data — no duplication, no re-entering information, no disconnected systems.

## Workforce Management

Rostering, leave, compliance and HR records for your whole team.

## Project & Resource Mgmt

Live status, resource allocation and milestone tracking

## Timesheet Management

Digital timesheets that feed into your finance systems.

## Service & Ticket Mgmt

Requests in a single queue with SLA tracking

## Learning & Training

Certifications, schedules and compliance — always current.

## Purchase & Sales

Orders, suppliers and sales activity — all connected.

## Document Management

Store, organise and retrieve documents. Always accessible.

## Finance Integrations

Operational data flows straight into your payroll and finance tools.

## Operational Workflows

Build and automate approval workflows to match your processes.

# Up and running in 6-10 weeks

**Discovery & Scoping**  
We map your processes, identify gaps and design the right configuration.

**Configuration & Migration**
