

# FORECASTING. COMPLIANCE. COSTING.

The success of your  
manufacturing  
depends on them.

## LOCK IT DOWN, BABY.

You're battling on the front lines. Wherefour tackles your inventory forecasting, compliance and cost control challenges to secure your success.

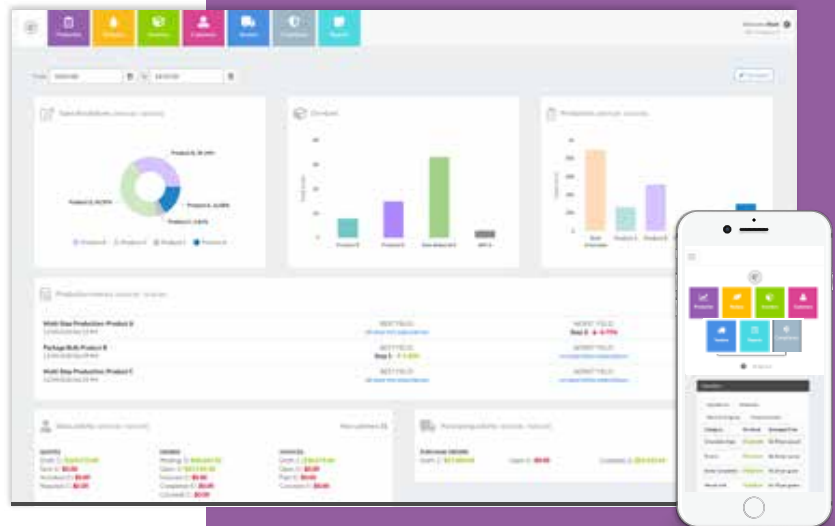

**Manufacturing is king.** Control production, manage costs, drive quality and safety, and know where everything is at all times with Wherefour. Affordable and modern traceability for any type of manufacturing.

**Breeze through compliance audits.** Wherefour ensures every transaction is captured and correct, unlocking full reporting and total transparency for you and your auditors, inspectors and large accounts.

**Traceability you can see.** Track everything used in your manufacturing business: date, time, user, lot code, customer, and all associated costs. Generate full backwards to forwards reports with a button click.

Wherefour's modern & mobile interface

# SERIOUS SOFTWARE THAT'S SERIOUSLY EASY.™

“The software is straightforward to build out and super simple to navigate. It is so easy to use that it saves us time in a lot of ways, including training new employees because it is not confusing or complex. We recently were audited by a customer with very stringent traceability requirements and demonstrated that we knew where all of the product went within five minutes.”

– Allison Buell, Compliance Manager

“I kept looking for a better way to organize and trace our raw ingredients and manufacturing process and found Wherefour. When we have certification audits, the data is exportable and at our fingertips. What used to take a day, now takes two hours.”

– Corrie Colbert, Owner and Formulator

“We chose Wherefour as our ERP system because it's elegantly simple and does what we need efficiently. It has really helped with audit traceability exercises. We have what we need in five minutes with a click of a button, and you don't have to be an IT director to use it.”

– Cheriene Griffith, VP of Production

## KEY FEATURES

- Customizable business intelligence (BI) dashboards
- Full start-to-finish™ traceability
- Material requirements planning (MRP) capability
- Runs anywhere – including mobile devices
- Access and role-based permissions
- Lot-coded inventory control
- Catch weight and expiration date functions
- Process and discrete manufacturing support
- Customer & vendor management
- Barcode printing and scanning
- Cloud-based compliance document storage
- Fully customizable QA tests
- Direct to store delivery (DSD) capability
- Integrates with QuickBooks® Online
- Integrates with QuickBooks® Desktop (including Manufacturing & Enterprise)
- Integrates with Sage Intacct®
- Integrates with Microsoft Dynamics®
- Integrates with Shopify®
- Integrates to 2,000+ other platforms via Zapier®
- Easy to use and configure
- Onboarding support
- Onsite & virtual training options via Wherefour Academy™
